

BANYAN-STRATUM-V4: WEEKLY PORTFOLIO OVERVIEW (EXPANDED UNIVERSE)

Audit Date: Saturday, August 22, 2026

Reporting Scope: Full Expanded Master Universe Deep-Scrutiny Audit (Sorted by Score: 4 → 1)

Execution Protocol: BS-V4 Hybrid Engine (200 SMA Macro Filter + 9/21 EMA Tactical Engine + Hard Anti-Peak RSI Constraints)

1. Executive Summary & Expanded Universe Integration

The BS-V4 Hybrid Engine continues to aggressively sanitize the 54-stock expanded master universe, rotating liquidity out of laggards and overextended rallies while heavily capitalizing on post-earnings structural dips.

Critical News Flow & Macro Impact:

- **TRENT (Core - Score 4):** Despite reporting a 21% year-on-year rise in Q1 consolidated net profit to ₹519 crore and an 18% jump in revenue, the stock experienced a healthy 3% post-earnings technical cool-off. This has driven the RSI down to a pristine 42.52, creating an optimal Zone A dip buy directly at its 21 EMA support floor.
- **POLYCAB (Growth - Score 4):** With robust sector-wide infrastructure tailwinds, Morgan Stanley recently upgraded Polycab's price target past the ₹10,000 mark. The asset has cooled to an RSI of 42.14, sitting flawlessly on its 9/21 EMA cluster, completely bypassing legacy SMA lag to trigger an immediate Zone A allocation.
- **DIVISLAB (Defens. - Score 1 Profit Lock):** Validating the massive 66% YoY surge in Q1 net profit to ₹902 crore, the stock remains highly extended. The RSI continues to print above the Anti-Peak Shield limit at 73.35, keeping the asset locked in Zone D for mandatory profit harvesting.
- **CHENNPETRO (Growth - Score 3):** Earning a solid Zone B strategic accumulation rating, Chennai Petroleum successfully wiped out previous net losses by posting a massive Q1 net profit of ₹1,016.67 crore, driven by elevated refining margins.
